

List of stoves

From Wikipedia, the free encyclopedia

This is a **list of stoves**. A stove is an enclosed space in which fuel is burned to provide heating, either to heat the space in which the stove is situated, or to heat the stove itself and items placed on it. Stoves are generally used for cooking and heating purposes.

Stoves

- Aprovecho – Aprovecho Research Center has worked on designs for cook stoves, primarily for use in developing countries. They are best known for the Rocket stove, developed by their technical director Dr. Larry Winiarski.^[1]
- Bachelor griller ^[2] – a countertop kitchen appliance with which a single person can grill, bake, boil or roast small portions of food
- Bamboo stove – an historical stove made in China in the late 14th century, it included bamboo to form the frame of the stove. The sides were cemented with clay and the inside walls and the ring on top were iron. It was about a foot tall.
- Beverage-can stove – a homemade, ultralight portable stove. The simple design is usually made entirely from aluminium cans and burns alcohol.
- BioLite
- Ceramic stove or tile stove
- Chambers stove – a generic name for several different kitchen cooking appliances sold under the Chambers brand name from 1912 to approximately 1988. Their ranges and stand-alone ovens were known for their patented insulation methods, which enabled them to cook on retained heat with the fuel turned off.
- Clean-burning stove – a stove with reduced toxic emissions. The term commonly refers to wood-burning stoves for domestic heating, although it is also applied to cooking stoves.
- Community Cooker
- Cook stove – heated by burning wood, charcoal, animal dung or crop residue. Cook stoves are commonly used for cooking and heating food in developing countries.
- Cosmo Stove – Cosmo Appliances has researched cook stove designs mainly for the retail market. They are best known for manufacturing their dual fuel all stainless steel stoves that feature a simple but futuristic design.^[3]
- EcoZoom
- Electric stove
- Foot stove
- Franklin stove – wood burning stove designed by Benjamin Franklin, and improved and made practical by David Rittenhouse
- Gas stove – uses natural gas, propane, butane, liquefied petroleum gas or other flammable gas as a fuel source.
- Hibachi
- Hoàng Cầm stove – a stove intake and chimney system which diffused and dissipated smoke from cooking which prevented aerial detection of smoke by American military planes.

A kitchen stove with oven that operates using flammable gas

- Hobo stove – a style of improvised heat-producing and cooking device used in survival situations,^[4] by backpackers, hobos, tramps and homeless people.
- Hot plate
- Kitchen stove – also referred to as a range, a kitchen appliance designed for the purpose of cooking food. Kitchen stoves rely on the application of direct heat for the cooking process and may also contain an oven, used for baking.
- Lò trấu – a type of versatile fuel burning cook stove used in Vietnam since the 1950s
- Masonry heater or masonry stove
- Multi-fuel stove
- NorthFire Technology (<http://northfire.technology/>)-NF Optimized Stove is an advanced force/fan air clean cooking stove.
- Portable stove
- Potbelly stove
- Primus stove
- Red Cross stove – a kitchen or parlor stove used for cooking and heating mainly North American homes of the late 19th and early 20th-century.
- Rocket stove
 - Rocket mass heater
- Shichirin – a lightweight, compact, and easy-to-move cooking stove
- Sigri (stove)
- Solar cooker
- Tea stove
- Tommy cooker – a compact, portable, solidified alcohol fuelled stove issued to British troops (Tommys) in World War I.^[5] It was notoriously ineffective; one soldier complained that it took two hours to boil half a pint of water.
- Turkey fryer
- Wood-burning stove – a heating appliance capable of burning wood fuel and wood-derived biomass fuel, such as wood pellets. Generally the appliance consists of a solid metal (usually cast iron or steel) closed fire chamber, a fire brick base and an adjustable air control.
