Category:Volcanoes

From Wikipedia, the free encyclopedia

*The main article for this category is **Volcano**.*

Volcanoes are usually mountains (sometimes islands, lakes, plateaus, calderas, seamounts or lava domes) that are formed when magma (liquid rock) wells up from inside the Earth. There are also analogous formations away from the Earth.

Many volcanoes are categorized both as volcanoes and other landforms, such as mountains (if qualified).

Wikimedia Commons has media related to ***Volcanoes***.

Subcategories

This category has the following 39 subcategories, out of 39 total.

- ▶ Volcanoes by continent (9 C)
- ▶ Volcanoes by country (104 C)
- ▶ Volcanoes by geochronology (6 C)
- ▶ Volcanoes by mountain range (3 C)
- ▶ Volcanoes by status (5 C, 1 P)
- ▶ Volcanoes by highest known Volcanic Explosivity Index of eruption (7 C)
