

A Very Good Low Cost Two-Way Radio for after PS Use

I have seen these sold new below \$11/each on eBay. This is a very good price. If you don't have a ham license don't worry there will be no one to care or checking after the pole shift. They work right out of the box. No programming needed.

Look for a "Baofeng-Pofung BF-888s UHF 400-470MHz 5W 16CH Two-way Ham Radio"

These would work well for a small group to be able to stay in com with each other. They are much better to use than most hand held CB radios and much lower in cost.
