

360 Degree Template

The following is a 360 degree template that can be printed (on paper or plastic) and pasted on to cardboard, stiff clear plastic, or something stiff to use for accurate angle or degree measurements.

For example:

If one prints on 8.5x11 paper at full size the result is a circle of about 10.25" diameter.

If 14" diameter is needed then print on 11x17 at 119 percent.
